

Meeting Notes
LD@LAB

On November 29, 2005, Carla Young, principal of the Nursery & Kindergarten school at Lab, made a presentation about Mel Levine's *Schools Attuned* program offered by the *All Kinds of Minds* institute. Ms. Young shared books and a short film about the program and described Lab's involvement with the program. Over the last few years, a number of teachers have taken advantage of the program's week-long training sessions, plus follow-up workshops, so that over 50 (primarily lower and middle school) teachers are now trained. The *Schools Attuned* program emphasizes the strengths of students rather than their challenges or difficulties, and this philosophy is one reason Lab feels the program is a good fit for the school.
